concrete

The journal of The Concrete Society

incorporating Concrete Works International
from November 1982

Index
Volume 16, 1982

Managing Editor
P V Maxwell-Cook

Editor
R J Barfoot

The Concrete Society Ltd is not responsible for the statements made or for the opinions expressed in this journal

Articles

A chance to meet Derek Lambert 9:26
Abrasives; Trials with entrained 8:19
Admixtures for economic concrete 12:19
Aerated concrete; Autoclaved 11:40
Airy Holm Dam; Concreting at 4:12
All systems go with Multicast 12:33
Alternatives to existing methods of design 4:37
America; Colour conscious in 10:22
America's first lady of precast 10:43
Application of fracture mechanics 6:43
Architectural concrete through the use of form liners; Textured 9:16
Autoclaved aerated concrete 11:40
Bangkok's birthday facelift 6:12
Berlin Symposium on impact and impulsive loading 8:18
Blackpool's coast protection story 1:12
Block plant; computer run 12:63
Block plant; Lift trucks play vital role at 10:56
Bridge-and-tunnel Channel link 1:18
Bridge conference; Toronto's 11:58
Bridge; Tasmania's kilometre-long 2:22
Bridge that gap—with an office block 6:10
Bridges 5:22
Buildings — UK Trends 5:27
By-passing Ipswich 12:30
Canoe; Orihune — a folded concrete canoe 1:20
Canoe races; 1982 concrete 8:16
Channel link; Bridge-and-tunnel 1:18
Church features internal concrete 9:35
CI'82 — Concrete in building construction 3:31
CI'82 Exhibition; A review of exhibits 3:35
CI'82 — looking back 7:12
Climates; Concrete for hot 12:14
Coast protection story; Blackpool's 1:12
Coating of sewer pipes 1:36
Codes and standards — time for harmonisation? 8:10
Cold worker reinforcing steels — Part 2; High yield deformed reinforcing bars — a commentary on the performance of hot rolled and 1:30
Colour conscious in America 10:22
Colour with a difference 10:27
Columns; Very slender reinforced concrete 7:24
Comparative use of intermediate pressure 8:19
Composite structures; Design consideration for PFA in prestressed 6:16
Computer-run; Block plant 12:63
Concrete canoe races; 1982 8:16
Concrete durability — specifying more simply and surely by strength 2:19
Concrete in the developing world 1:15
Concrete for hot climates 12:14
Concrete practice; Encompassing 7:22
Concrete Society Award 1982; The 6:19
Concrete Society; The international role of the 5:39
Concreting of Derwent-Wear-Tees Tunnel 8:13
Conference; Toronto's bridge 11:58
Considering semi-dry concrete 10:20
Control of high workability concrete 3:21
Corrosion resistance of concrete; Improving the 8:29
Corrugated roofing; Creep of fibre-reinforced 6:13
Cover meter and dowel bar alignment on motorways 3:18
Creep of fibre-reinforced corrugated roofing 6:13
Cutting concrete with water jets 8:19
Deformed reinforcing bars — a commentary on the performance of hot rolled and cold worker reinforcing steels — Part 2 High yield 1:30
Derwent-Wear-Tees Tunnel; Concreting of 8:13
Design consideration for PFA in prestressed composite structures 6:16
Design; Precast technology advances through 5:45
Developing world; Concrete in the 1:15
Developments in structural and foundation codes; International 3:45
Do-it-yourself learning 7:20
Dowel bar alignment on motorways; Cover meter 3:18
Durability — specifying more simply and surely by strength; Concrete 2:19
Economic concrete; Admixtures for 12:19
Elastic design of doubly reinforced concrete sections 1:42
Encompassing concrete practice 7:22
Exhibition; Henke House 10:40
Existing methods of design; Alternatives to 4:37
Factors influencing the workability of steel fibre reinforced concrete Part One 10:45
Fibre-reinforced corrugated roofing; Creep of 6:13
FIP; The Exhibition 5:49
FIP; The Ninth International Congress of the 5:21
FIP President; First British 11:17
First British President for FIP 11:17
Floor structure; Swede Beam System; a Scandinavian 4:19
Form liners; Textured architectural concrete through the use of 9:16
Forts; Looking for London's lost 2:12
Foundations?; Where are we going with 2:18
Fracture mechanics; Application of 6:43
General behaviour of polypropylene fibre concrete 4:33
Henke house exhibition 10:40
High workability concrete; Control of 3:21
High yield deformed reinforcing bars 1:30
Hot climates; Concrete for 12:14
Hot rolled and cold worker reinforcing steels — Part 2; High yield deformed reinforcing bars — a commentary on the performance of 1:30
Housing in the Middle East 11:51
ICT; 7500 years of concrete — Tenth Annual Convention of the 8:22
Improving the corrosion resistance of concrete 8:29
Impulsive loading; Berlin symposium on impact and 8:18
Interbuild; Seen first at 2:32
Intermediate pressure; Comparative use of 8:19
Internal concrete; Church features 9:35
International developments in structural and foundation codes 3:45
International Road Symposium 11:44
Ipswich; By-passing 12:30
Jersey debut for sea-wall unit 7:26
Jets; Cutting concrete with water 8:19
Lambert; A chance to meet Derek 9:26
Learning; Do-it-yourself 7:20
Liebherr claim truckmaker breakthrough 12:34
Lift trucks play vital role at block plant 10:56
Looking for London's lost forts 2:12
London's lost forts; Looking for 2:12
Looking for London's lost forts 2:12
Mica in concrete — a case history from Eastern Nepal 3:12
Middle East; Housing in the 11:51
Motorways; Cover metre and dowel bar alignment on 3:18
Multicast; All systems go 12:33
Nepal; Mica in concrete — a case history from Eastern 3:12
Office block; Bridge that gap—with an 6:10
Orihune — a folded concrete canoe 1:20
Other structures 5:33
Paving the way to success 12:70
Paving; Rapid repair of concrete 9:12
Peak of fifty piles a day 12:52
PFA in prestress composite structures; Design consideration for 6:16
Piles a day; A peak of fifty 12:52
Placing methods 11:23
Planning for the pump 11:20
Polypropylene fibre concrete; General behaviour of 4:33
Port Talbot precasting factors 11:14
Portland cement properties — past and present 7:16
Precast; America's first lady of 10:43
Precast technology advances through design 5:45
Precasting factors; Port Talbot 11:14
Pressures; Comparative use of intermediate 8:19
Prestressed composite structures; Design consideration for PFA in 6:16
Properties — past and present; Portland cement 7:16
Protection story; Blackpool's coast 1:12
Pump; Planning for the 11:20
Quality engineering in concrete 12:24
Rapid repair of concrete pavings 9:12
Reinforcing bars — a commentary on the performance of hot rolled and cold worker reinforcing steels — Part 2; High yield deformed 1:30
Reinforced concrete section; Elastic designed of doubly 1:42
Repairs to reinforced concrete 12:36
Repair of concrete pavings; Rapid 9:12
Research; Some personal research on 5:37
Riots; The trouble with 4:17

Road symposium; International 11:44
Sea-wall unit; Jersey debut for 7:26
Telford's changing images 7:34
Seen first at Interbuild 2:32
Semi-dry concrete; Considering 10:20
Sewer pipes; Coating of 1:36
Site-produced sprayed concrete 12:44
Snow Awards for Innovation 1981; The 1:24
Some personal research on research 5:37
Sprayed concrete; Site produced 12:44
Standards — time for harmonisation?; Codes and 8:40
Steel fibre-reinforced concrete; Factors influencing the workability of Part One 10:45
Steels — Part 2; High yield deformed reinforcing bars — a commentary on the performance of hot rolled and cold worker reinforcing 1:30
Structural and foundation codes; International development in 3:45
Structures; Other 5:33
Swede Beam System; a Scandinavian floor structure 4:19
Tasmania's kilometre-long bridge 2:22
Tenth Annual Convention of the ICT; 7500 years of concrete 8:22
Textured architectural concrete through the use of formliners 9:16
The international role of the Concrete Society 5:39
The Ninth International Congress of the FIP 5:21
The trouble with riots 4:17
To pump or not? 11:27
Toronto's bridge conference 11:58
Trials with entrained abrasives 8:19
Truckmixer breakthrough; Liebherr claim 12:36
Tunnels — concreting of; Derwent-Wear-Tees 8:13
Very slender reinforced concrete columns 7:24
Water jets; Cutting concrete with 8:19
Where are we going with foundations? 2:18
7500 years of concrete — Tenth Annual Convention of the ICT 8:22
1982 Concrete Canoe Races 8:16
